US Army Corps of Engineers  
Washington, DC 20314

EM 1110-3-166

Engineer Manual  
No. 1110-3-166

9 April 1984

Engineering and Design  
WATER SUPPLY, FIRE PROTECTION  
Mobilization Construction

|  | <u>Paragraph</u> | <u>Page</u> |
|--|------------------|-------------|
| <b>CHAPTER 1. GENERAL</b>  |                  |             |
| Purpose and scope . . . . .  | 1-1              | 1-1         |
| Definitions . . . . .  | 1-2              | 1-1         |
| <b>CHAPTER 2. BASIC DESIGN CONCEPTS</b>  |                  |             |
| General . . . . .  | 2-1              | 2-1         |
| Guide for the use of this<br>manual . . . . .  | 2-2              | 2-2         |
| <b>CHAPTER 3. PROCEDURE FOR DETERMINING<br/>BUILDING FIRE FLOW DEMAND</b>  |                  |             |
| General . . . . .  | 3-1              | 3-1         |
| Step one . . . . .   | 3-2              | 3-1         |
| Step two . . . . .   | 3-3              | 3-1         |
| Step three . . . . .   | 3-4              | 3-1         |
| Step four . . . . .  | 3-5              | 3-4         |
| Step five . . . . .  | 3-6              | 3-4         |
| Step six . . . . .   | 3-7              | 3-4         |
| Step seven . . . . .   | 3-8              | 3-4         |
| Step eight . . . . .   | 3-9              | 3-7         |
| Sample calculations . . . . .  | 3-10             | 3-7         |
| <b>CHAPTER 4. PROCEDURE FOR DETERMINING POL,<br/>VEHICLE PARKING, AND YARD<br/>STORAGE FACILITY FIRE FLOW<br/>DEMAND</b> |                  |             |
| General . . . . .  | 4-1              | 4-1         |
| Above-ground atmospheric POL<br>tanks . . . . .  | 4-2              | 4-1         |
| Above-ground pressurized POL<br>tanks . . . . .  | 4-3              | 4-2         |
| POL handling facilities . . . . .  | 4-4              | 4-3         |
| Aircraft parking and refuel-<br>ing facilities . . . . .   | 4-5              | 4-3         |
| Vehicle parking . . . . .  | 4-6              | 4-3         |
| General yard storage . . . . .   | 4-7              | 4-3         |
| Sample calculations . . . . .  | 4-8              | 4-6         |

EM 1110-3-166

|  | <u>Paragraph</u> | <u>Page</u> |
|--|------------------|-------------|
| CHAPTER 5. PUMPING STATIONS FOR FIRE PROTECTION WATER SUPPLY |                  |             |
| General provisions . . . . .                                 | 5-1              | 5-1         |
| Pump type. . . . .   | 5-2              | 5-1         |
| Pump size. . . . .   | 5-3              | 5-1         |
| Pump starting arrangement. . .                               | 5-4              | 5-1         |
| Pump drive . . . . .   | 5-5              | 5-1         |
| APPENDIX A. SAMPLE CALCULATIONS                              |                  | A-1         |
| APPENDIX B. REFERENCES                                       |                  | B-1         |

#### LIST OF FIGURES

- Figure 3-1. Type V (combustible) construction curves (0 to 200,000 square feet)  
3-2. Type V (combustible) construction curves (0 to 25,000 square feet)  
3-3. Exposure factor curve  
4-1. Yard storage curves (0 to 100,000 square feet)  
4-2. Yard storage curves (0 to 25,000 square feet)  
A-1. Sample 1 area plan  
A-2. Sample 2 area plan

#### LIST OF TABLES

- Table 3-1. Distance versus separation factor.  
3-2. Required fire flow duration.  
3-3. Water demands for sprinklered facilities.  
3-4. Water demands for rubber tire storage.  
4-1. Atmospheric POL tank cooling water.  
4-2. Pressurized POL tank cooling water.  
A-1. Quick reference fire flow requirements.
